# Ogre 50

OGRE 50 is our smallest portable water ozonation device. You can use it to sanitize, disinfect and cleanse anything, anywhere without harsh chemicals.

With OGRE you can make the most powerful sanitizer out of regular tap water. And by powerful we mean stronger than your regular sanitizers such as bleach or hydrogen peroxide.

Small bottle –  
air travel compatible  
(50ml)

## How to use?

- 1 Fill with regular cold (10°C) tap water
- 2 One click to activate the water
- 3 Wait for 1 minute
- 4 Ozonated water is ready to use!
- 5 Spray and wait for 5 sec
- 6 Volia! 99,999% of pathogens are gone!

## Product specifications

|                       |  |
|-----------------------|--|
| Product               | OGRE 50                                    |
| Product model #       | EOD00003                                   |
| Capacity              | 50 ml                                      |
| O3 output             | Dissolved ozone in water / 0.5 ppm - 1 ppm |
| Size                  | 40 x 139 mm                                |
| Weight                | 93g  |
| Power Input           | DC 5V 1A                                   |
| Battery charging time | 4h   |
| Battery lifetime      | 400 full charges                           |
| Lifetime of device    | ca 8 000 sanitizing cycles                 |
| Warranty time         | 12 months                                  |
